

Uploading Your Website

to the Langara MYLINUX instructional server

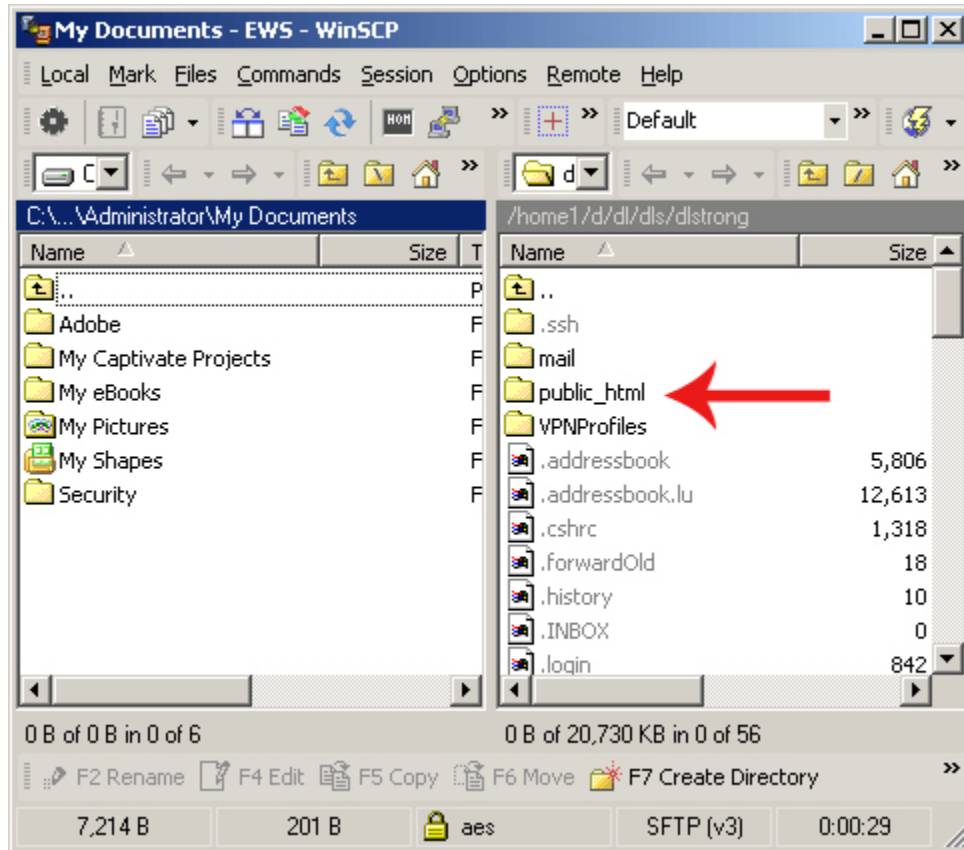

1. Launch WinSCP: Start > All Programs > Internet Software > WinSCP

2. Fill in the Session Properties dialogue box as follows:

- **Host Name:** mylinux.langara.bc.ca
- **Port number:** 22
- **User Name:** your Langara ID
- **Password:** your Langara Password
- **Private key file:** leave blank
- **Protocol:** check FTP

3. Click **Login** and you'll be taken to the File Transfer window. (See next page)

In this window you have two panels:

- Left panel: Files on Your Computer
 - Right panel: Files on mylinux Server
4. In the right browser window double-click on the **public_html** folder.
 5. In the left browser window navigate into your **project** folder.
 6. Select all the project files including html pages and the images folder.
 7. Drag and drop them **inside** the **public_html** folder on the right panel.
 8. To access your website from any Internet connected computer, just launch a web browser and type the following into the address bar:

<http://mylinux.langara.bc.ca/~YourLangaraID/index.html>

You can **download** WinSCP for FREE from here:

http://download.cnet.com/WinSCP/3000-2160_4-10400769.html
