

# Website Design Introduction

**Assignment 2:** Create a 4-page website with HTML coding.

---

*Instructions:*

Create a website with **four pages** to include the following navigation bar on the top and the information as shown below for each page:

[Home](#) | [About](#) | [Prices](#) | [Contact](#)

*NOTE: the above navigation bar needs to be on every single page.*

**Subject:** a bakery shop in Vancouver

**Page title:** your full name

**Banner:** on the top of the page (980X200px)

**Text content:** each page needs to have at least one heading and a paragraph

**Prices page:** insert a table with two columns and 5 rows and enter some random data in the prices page.

| Item | Price |
|------|-------|
|      |       |
|      |       |
|      |       |
|      |       |

## Submission:

Please upload all html pages and image and email me the link to your site:

**link format:** <http://mylinux.langara.bc.ca/~username>
